

## WHAT IS CLAIMED IS:

1. An apparatus for programming recording of a TV program and/or a radio program in accordance with an instruction of a user, comprising:

5 a display unit adapted to display an analog clock; and

a control unit adapted to display programmed recording information at a corresponding time position of the displayed analog clock in a superposed manner.

10 2. The apparatus according to claim 1, further comprising a setting unit adapted to move an hour hand of the analog clock to a desired time position to set the time as recording operation time.

3. The apparatus according to claim 2, wherein said  
15 control unit changes a display color of a dial in accordance with the programmed recording operation time is in the forenoon or afternoon.

4. The apparatus according to claim 1, wherein said control unit changes a display color of the recording  
20 information in accordance with contents of the recording information.

5. The apparatus according to claim 1, wherein the recording information contains at least one of a received channel number and a genre of the program.

25 6. A video recording apparatus comprising an apparatus of claim 1.

7. An apparatus for programming recording of a TV

program and/or a radio program in accordance with an instruction of a user, comprising:

a unit adapted to display a calendar of a predetermined number of days; and

5 a unit adapted to display an analog clock having programmed recording information displayed at a corresponding time position at a corresponding date position of the displayed calendar in a superposed manner.

10 8. A video recording apparatus comprising an apparatus of claim 7.

9. A control method for a programming apparatus for programming recording of a TV program and/or a radio program in accordance with an instruction of a user,

15 comprising the steps of:

displaying an analog clock; and

displaying programmed recording information at a corresponding time position of the displayed analog clock in a superposed manner.

20 10. A program which controls a programming apparatus for programming recording of a TV program and/or a radio program in accordance with an instruction of a user, the program executing the steps of:

displaying an analog clock; and

25 displaying programmed recording information at a corresponding time position of the displayed analog clock in a superposed manner.
